SUMMARY	
The information in this “Summary” section is qualified by the more detailed information set forth in the underlying supplement, the prospectus supplement and the prospectus. See “Additional Terms of the Notes” in this pricing supplement.	
Issuer:	Canadian Imperial Bank of Commerce
Reference Asset:	The worst performing of the SPDR [®] Dow Jones [®] Industrial Average ETF Trust (Bloomberg ticker: DIA) (the “DIA”), the SPDR [®] S&P 500 [®] ETF Trust (Bloomberg ticker: SPY) (the “SPY”), and the Health Care Select Sector SPDR [®] Fund (Bloomberg ticker: XLV) (the “XLV”) (each, a “Fund” and together, the “Funds”)
Principal Amount:	\$1,000 per note
Aggregate Principal Amount:	\$2,722,000
Term:	Approximately four years, unless previously called
Strike Date:	February 13, 2024
Trade Date:	February 14, 2024
Original Issue Date:	February 20, 2024
Final Valuation Date:	February 14, 2028, subject to postponement as described under “Certain Terms of the Notes—Valuation Dates—For Notes Where the Reference Asset Consists of Multiple Funds” in the underlying supplement.
Maturity Date:	February 17, 2028. The Maturity Date is subject to the Call Feature and may be postponed as described under “Certain Terms of the Notes—Interest Payment Dates, Coupon Payment Dates, Call Payment Dates and Maturity Date” in the underlying supplement.
Contingent Coupon Payment:	On each Coupon Payment Date, you will receive a Contingent Coupon Payment of \$22.75 per \$1,000 principal amount (or 2.275% of the principal amount, equivalent to 9.10% per annum) if, and only if, the Closing Price of the Worst Performing Underlying on the related Coupon Determination Date is greater than or equal to its Coupon Barrier Price. If the Closing Price of the Worst Performing Underlying on any Coupon Determination Date is less than its Coupon Barrier Price, you will not receive any Contingent Coupon Payment on the related Coupon Payment Date. If the Closing Price of the Worst Performing Underlying is less than its Coupon Barrier Price on all quarterly Coupon Determination Dates, you will not receive any Contingent Coupon Payments over the term of the notes.
Coupon Barrier Price:	\$287.12 with respect to the DIA, \$370.56 with respect to the SPY, and \$107.15 with respect to the XLV, each of which is 75% of its Initial Price (rounded to two decimal places for the DIA and the XLV).

Assumption: The underlying indexes issued price: DIA = 382.82, SPY=494.08, XLV=142.86; Number of simulation path is 100,000; Principal amount is 1,000

The Correlation Matrix:
